

Pipeline

Excel Sheet Banai Har bande ka Bday usme dal ke rakha hai..

Check aaj kiska bday hai

Email Aajae

Pipeline Scenarios:

Abhi terraform ka code likha hai jisse azure pr infra banane ke try kr rahe hai..

Infra ban ne ke baad, Stop and Start non Prod VM at night and morning..

Find unused Public IP's

Find Unattached Disks

Find Expired certificates

Generate Azure Cost report

Infra banane ke lie terraform script likh rahe hai

Upr me sb reports nikalne ke lie

Powershell/Bash/Python script likha jata hai..

10 VM pr nginx dalna hai, Ansible me playbook bana ke pipeline se deploy kr skte

Requirement: resource group ke data ko excel se read krke tfvars me convert krna hai..

Request: Discussion and grouping very important

1. Excel se birthdate scan krna tha aur jis bande ka bday ko uska reminder slack pr chahiye tha..

Iske lie powershell se ChatGPT se likha

2. Likhne ke baad local pr chala kr test kia..

3. Code ko repo bana ke push kr dia..

4. Push krne ke baad ek pipeline banaya..

5. Pipeline me Project and Repo and Branch set kia

6. usme agent set kr dia..

7. Job me pehla task add kia ki isme script chalao..

8. Powershell search krke uska template ko add kia...

9. 10:35 ka trigger set kar dia...

Group Discussion bina nahi ho paega...

Requirement

Excel CSV

PowerShell

Terraform.tfvars

Pipeline Banane ka process

Pehle Manual Feel karna hai

Fir Pipeline me vo same commands utha ke dal dena hai..
